**Subject:** RE: reminder - conference call on Monday

Hi folks-

According to my notes, some of the remaining R2 report issues that have a less than clear pathway for resolution include:

1. LOEs/WOE for ERA and PRGs/AOPCs (enough acronyms in that one for ya? ☺)
2. Benthic assessment

3. SQVs based on Eq partitioning from TZW (to be discussed at 7/26 GW meeting)

We should also plan to discuss the issues and process for resolving EPA's comments on the R3A FSPs for sediment traps and surface water.

Keith
